ReArrhythmogenic left ventricular  
cardiomyopathy: molecular mechanisms,  
diagnostic challenges, and implications for  
therapy. Arrhythmogenic cardiomyopathy  
(AC) is an increasingly recognized cause of  
arrhythmias in otherwise healthy adults. As a  
result of recent studies, the International  
Task Force Criteria for a clinical diagnosis of  
AC have been revised. New histopathologic  
diagnostic features have been developed,  
and 3 distinct genetic mechanisms of AC  
have been delineated. Importantly, new  
therapeutic strategies have also been  
developed, with a potential benefit in

---

preventing sudden cardiac death. This review discusses the newly described features of the disease, provides an overview of the diagnostic criteria of the revised task force criteria, and provides an update on the molecular pathogenesis of AC.

**Albert Groh** (30 November 1881 – 9 March 1962) was a German painter, art historian and museum curator. Groh was born at Obernau, in the Grand Duchy of Baden, to a Jewish family. He studied from 1902 to 1905 at the, working under its director, Wilhelm von Diez. He then worked in a workshop in Stuttgart. He gained an extension to his first teaching diploma at the Academy of Fine Arts, Stuttgart, and studied at the Kassel Academy of Art from 1907 to 1910. He became an extraordinary professor in Stuttgart in 1911. He traveled through Spain, Morocco, Italy, and Egypt. He married the painter and Art historian, Elisabeth Marbach. After the Nazis came to power in 1933 he was forced to close his studio. He was able to obtain a visa to the

---

United States in 1938, when he was able to come to his studio in New York City. He went to the United States and finally settled at Santa Barbara, California. He died in New York City in 1962. Works and career Groh was very different from his contemporaries at the school in Stuttgart. He was one of the first to break with impressionism and made the most of the exotic scenery he saw in Egypt and Morocco. His beautiful scenes of the Sahara, the mountains and seas of the Sahara in *The Desert*, and Morocco were considered modern and exceptionally representational. He also spent time at the University of Berlin. He was also interested
