DrvCareXP delivers highly efficient and quick disk maintenance tool. It not only provides you with all commonly used disk functions as well as windows disk software but also combines all of them into one nice GUI. It claims to defragment your disk and organize its files, thus making the disk run faster. However, the disk is turned off during the defragmentation process. In addition, it includes the ability to auto-clean your registry files and make sure your system and your Windows are safe and secure. It also contains some basic utilities for fixing common computer problems. With DrvCareXP, you can repair and scan your hard disk, manage and protect your registry, and optimize your Windows system. It's available to download for both Windows XP and Vista. You may be able to have a deeper insight on the software program. It can be a slight drawback that it requires an internet connection to work, so it is advisable to have a WiFi connection. Muzikiz is a new Muzak-style application designed to make playing your music files the most pleasant experience. First things first, Muzikiz doesn't do any recording so it is not technically a Muzak application, as the developers prefer to call it. However, the trademarked name is still in the title bar of the application. Anyway, once you launch the program, you can see a new player window with a few icons placed on it, with a music icon being the more noteworthy among them. If you play any media file on your computer, Muzikiz will let you know what files are currently playing. All the old, Winamp-style Muzak features are present in Muzikiz, such as playlists, scrobbling, radio stations and statistics. You can also play your music files right in the Muzikiz player, which is a nice feature. Muzikiz has a great-looking interface and offers numerous styles of visualization that are useful for various types of music and videos. You can also organize music playlists and filter them according to genres. The feature that makes Muzikiz stand out from its competition is the ability to compare various versions of a song and keep track of which is the most recent, thus enabling you to create custom versions of the songs on the fly. Muzikiz offers a nice and detailed widget that you can use to get all sorts of information regarding your music tracks. On the downside, the Mu 3a67dffec
