JigBasket, used for computer aided milling, is a CAD program for parts that can be easily assembled by hand. Operating systems AutoCAD Cracked Accounts supports Microsoft Windows, Macintosh and UNIX. It was initially released on DOS and compatible IBM PC-compatible machines running Microsoft Windows. AutoCAD Free Download has been ported to Unix and Linux operating systems. AutoCAD LT and earlier releases, starting from AutoCAD 2001, used the Windows Installer deployment technology. The stand-alone version has been replaced by Autodesk Fusion. AutoCAD 2008 introduces native support for Linux, Macintosh OS X, and UNIX. Although the runtime environment is common to all AutoCAD versions, the user interface differs significantly between the different platforms. The Mac version is optimized for the user interface of OS X, which is commonly known as the Aqua user interface. To run AutoCAD on the Mac, it is not sufficient to install the AutoCAD application on a Mac

computer. The user also has to install the AutoCAD Designers package, which provides access to a wide range of additional design tools. AutoCAD LT 2008 does not support Microsoft Windows, so the application can only be run on a Macintosh or on a Unix and Linux computer. AutoCAD 2010 uses the Unified Installer technology, which installs the runtime environment and the application for all supported platforms. Unused system services are removed during the uninstall process. Enjoy the full version of Autodesk Autocad.Q: Codeigniter 3.0: no data in my database I have a problem with my codeigniter 3.0 on my website: no data appear in my database. The file config.php: $config['base_url'] = ''; $config['index_page'] = ''; The file MY_Routes.php: $route['default_controller'] = 'pages'; $route['404_override'] = ''; The file MY_Controller.php: public function pages() { echo "fff"; } the file pages.php: index(); } } Can you help me? Thanks. A: you must create a function that can insert data in database as follows: Example: public function insert_data($param) { $this->load->database(); $data = array('type' => $param, 'name' => $this->input->post('name'), 'age' => $this->input->post('age')); $this->db->insert('name', $data); } FILED
