What is the difference between drafting, design and editing? Drafting is the process of preparing the final product. It usually consists of laying out the design elements on paper or a table surface. Design is the process of deciding what the final product will look like, how it will work, and what the product requirements are. This is when the project details are finalised and

typically involves taking into account cost and time to develop. Editing is the process of arranging and checking all the design and drafting elements to be sure that the final product is a good fit for the design specifications and requirements. "Raster Draw Engine" which means it creates the objects on screen as bitmap pixels and draws them on the screen. There are many objects, including lines, polylines, polyangles, circles, rectangles, arrows, text, text objects, path editing tools, ellipse, ellipse objects, and many more. Objects are drawn as bitmap pixels. Since it is a raster draw engine, objects are created bitmap pixels (they are not vector drawings and do not contain

any vertices). The software can also take advantage of hardware acceleration. Objects are on a layer and are arranged from front to back, and on each layer are objects that are sorted by the order they are created, with the most recently created objects at the front of the layer. The order of layers can be changed at any time. Each object can have a Z-Order, which affects the objects drawing order. Objects with a higher Z-Order will be drawn

on top of objects with a lower Z-Order. The default layer order is Layer, then Object, then View, then Mask, then Plan. Each layer has a Z-Order of 1, 2, 3, 4, or 5 (highest) There are multiple ways to draw objects: On screen: Draw screen object that is displayed on screen, using BMP, or render to a file In Memory: Draw object in memory, only used when drawing to a file. This is used when creating TIFF, PS, or PDF files On Pen: Only used

when drawing on a printer. If you are printing to a PostScript printer, then the printer driver will read this instruction. If you are printing to a PDF printer, then the PDF printer driver will read this instruction. If you are printing to a print-over-PDF printer, such as a PDF printer without automatic document feeder, then the print-over-PDF printer will read this instruction. Critics Circle Award for nonfiction, is being reissued for the bicentennial of the U.S. Women's Rights Movement, with a new introduction by historian Jill Lepore. "In 1963, the year that I was 20 years old, I was making $14,000 as a secretary in my parents' law firm," she wrote. "I had a love affair in Los Angeles, a marriage at home, and a baby.
