How to install this video? Resolume don't have enough space?Click the button below: Please switch to a browser that supports iframes Give us a positive rating and we may give you free credits on good choice. Just let us know how we could improve our service to you. Siganty - we make video streaming easy Siganty don't want to see you with a distorted time, lagging videos and low bandwidth. All you need to do is to register as a user. Go to your browser and search for the Video URLs you like, to the address bar type siganty://video. Then click on the log in link. If you need a password and PIN, you can get it by clicking on the magnifying glass near to the video control bar. Then you will be asked to enter the login details. Make sure to fill the e-mail address and the username correctly. This will allow you to enjoy the video and all the features that come with it. You can logout and it will ask you to enter the same details again next time you visit the site. If you have any difficulties or questions to our support team please contact us by e-mail support. You'll find our e-mail on the contact page. Two faces of 3-meresiduophenyl-5,6-diarylpyrazolo[1,5-a]pyrimidines as p21-dependent cyclin-dependent kinase 2 inhibitors. 5,6-Diarylpyrazolo[1,5-a]pyrimidines are p21-dependent cyclin-dependent kinase (CDK) 2 inhibitors. This series of compounds features an N,N-dimethyl-3-methoxypropenamide moiety as a 2-position substituent. Whereas a methyl group in the N,N-dimethyl-3-methoxypropenamide moiety is a necessary feature for p21-dependent CDK2 inhibition, the larger 3-methoxypropenamide moiety could be tuned for optimal activity by the small 3-methoxypropenamide substituent, including 3-methoxymethyl, 3-methoxyethyl, 3-methoxypropyl, and 3-methoxyprop-2-enyl (3-methoxyprop-2-en-1 c6a93da74d
